# Sound Protection

## Overview

CLM Vibetech, Inc. high-quality sound protection solutions help to significantly reduce vibratory machine noise levels in industrial settings. Protecting employee safety and welfare is essential to productivity and adding our soundproofing products to your equipment creates a quieter, more efficient work environment.

Our most economical solution, a sound cover, is made of industrial strength vinyl with one-inch sound abatement foam and available in a variety of color choices. Covers may be purchased in a drape-on or suspended style and are custom fitted to your machine using any necessary skirt cutouts that are

required for inlets and outlets. Hatches (for viewing and adding parts) may also be added in the top of the cover. Additionally, heavy-duty steel stands with a winch are available for raising and lowering the cover onto the machine.

For increased durability, we also offer rigid sound hoods made of aluminum and sound abatement foam. Mounted off of a heavy-duty structural steel base frame, the weight of the hood is carried by an electric linear actuator which allows for a smooth and safe movement.

### Advantages

- Reduces sound pollution by 8-10+ decibels
- Offers safety and protection for employees
- Provides a quieter, more efficient work environment
- Effectively absorbs sound waves
- High-quality soundproofing solutions

### Results

CLM Vibetech's sound protection solutions effectively minimize noise transmission and absorb sound waves, reducing sound pollution by 8-10+ decibels. Additionally, our sound covers and hoods offer safety and protection for employees, thus providing a quieter, more efficient work environment. Fully customized sound protection options are also available. Contact us today for a complimentary quote at (269) 344-3878.

### Key Features

- **Soft Sound Cover:** heavy-duty vinyl with sound abatement foam
- **Rigid Sound Hood:** aluminum and sound abatement foam
  - Heavy-duty structural steel base frame
  - Electric linear actuator
- Stand with winch option
- Suspended-style vinyl covers available
- Wide selection of vinyl color choices
- Vinyl hatch and cut-out options
- Custom sound solutions available
